### /Verse 2\

Our galaxy itself contains a hundred billion stars  
It's a hundred thousand light years side to side  
It bulges in the middle, sixteen thousand light years thick  
But out by us, it's just three thousand light years wide  
We're thirty thousand light years from galactic central point  
We go round every two hundred million years  
And our galaxy is only one of millions of billions  
In this amazing and expanding universe

### /4/4 Verse 3\

The universe itself keeps on expanding and expanding  
In all of the directions it can whizz  
As fast as it can go, at the speed of light, you know  
Twelve million miles a minute, and that's the fastest speed there is  
So remember, when you're feeling very small and insecure  
How amazingly unlikely is your birth  
And pray that there's intelligent life somewhere up in space  
'Cos there's bugger-all down here on Earth
